Practice Website	https://dentalpracticefallowfield.co.uk/

Practice Profile: (e.g. how many surgeries, equipment, location/area, staff members, dentists with special interests, etc)	<p>We are a 4-surgery mixed practice based in South Manchester, approximately 2 miles south of city centre. We are close to the university, hospitals and vibrant student hub of Fallowfield. We have on-site parking and plenty of public transport options. Commuting from Manchester city centre would take around 10 minutes.</p> <p>The practice has recently been renovated and the Foundation Dentist surgery is bright, spacious and air conditioned with high quality equipment. There are three dentists, one Foundation Dentist, a Dental Therapist and a visiting Oral Surgeon.</p> <p>Our patient base is very diverse, and we provide a lot of private work on top of our NHS treatments. We offer dental implants, IV sedation, Invisalign and general cosmetic work all in-house. This provides exposure to a wide array of dentistry and will help Foundation Dentists understand and learn comprehensive treatment planning, treatment delivery and help allow them to make decisions on what they may want to offer in the future.</p> <p>We have a digital OPG, an iTero intraoral scanner, rotary endodontics as well as a warm obturation system.</p> <p>The staff are highly experienced and we have a friendly and supportive culture to help foster growth and confidence in the team, with an open door policy throughout the practice.</p>

ES Biography:	I qualified from the University of Manchester in 2006 and worked as an associate for over 10 years before taking over The Dental
----------------------	----------------------------------------------------------------------------------------------------------------------------------

Practice. My roles have involved working in the NHS, privately, working as a locum, working in emergency clinics and also as a peripatetic implant placing dentist. I have attended a plethora of courses both in the UK and abroad on cosmetic and dental implant treatments and passed the MFDS qualification in 2014. I have amassed a vast amount of experience over the years and provide all aspects of general dentistry, cosmetic dentistry, dental implants, bone grafting procedures and orthodontic treatment. This experience allows me to help train Foundation Dentists to the highest standard, aiming to leave them competent and confident to tackle the world of dentistry on their own at the end of the year!
