

## ST4 Psychiatry Specialties - National Recruitment, for use for start dates from August 2018 onwards CERTIFICATE C - CORE COMPETENCE EOUIVALENCE REPORT

This report indicates the competences obtained and assessed and must be completed by a person who has been directly responsible for your training and supervision for a minimum continuous period of three months (whole time equivalent).

In order to be eligible to apply for specialty training at ST4 level in psychiatry, applicants must demonstrate that they have attained and maintained the core competences set out in all 19 Intended Learning Outcomes in the 2013 core psychiatry curriculum<sup>1</sup>.

This report should be used as part of evidence:

• if the applicant is unable to provide any other form of evidence, such as ARCP<sup>2</sup> reports, to support an application for advanced training.

The report should be supported by a comprehensive portfolio of evidence demonstrating how the competences have been attained and maintained. The person completing this form must consider the actual progress of the applicant and be fully satisfied that all the competences have been obtained and give relevant details.

As a benchmark, by the end of CT3/ST3 the trainee will be "safe to make decisions in all but the most complex clinical situations; competent".

Section 1. Basic information					
About the person signing the form (the signatory)					
Signatory name					
Signatory email address					
Position/Job Title					
Relationship to applicant

## **Section 2: EVIDENCE SUMMARY**

## 2.1. continuing development

The applicant must demonstrate to the supervisor that he/she has been engaged in continuing professional development and appraisal. Documentation from training, ARCPs, appraisals and any other relevant reports must be shared and the applicant must show how they have developed. Any reports from trust or other investigations into performance and any reports from other bodies such as the General Medical Council (GMC) that are still current must also be shared with the supervisor. It is the applicant's responsibility to ensure that no relevant information is withheld.

applicant's responsibility to ensure that no relevant inf	ormation is withheld.	
All of the 19 ILOs must have been	n demonstrated and maint	ained
The applicant has produced all available evidence of performance in previous posts, including ARCP results, appraisal, complaints, and investigations.		☐ yes ☐ no
Is there evidence that any learning objectives and performance concerns have been satisfactorily met?		☐ yes ☐ no
2.2. Psychotherapy		
Assessment	Achieved at least satisfacto domains	ry in all
SAPE <sup>3</sup> or other form of recording psychotherapy	☐ yes ☐ no	
experience - Short duration therapy	Provide details	
SAPE or other form of recording psychotherapy	☐ yes ☐ no	
experience - Long duration therapy	Provide details	
2.2 Professional Competences		
2.3. Professional Competences		
2.3a Curriculum coverage		
In assessing these domains you should assess the appropriate core psychiatry training as set out in the curriculum.	plicant against the expectations for	completion of
It is the applicant's responsibility to bring together all		
achieving the competences. The evidence is likely to in	nclude workplace based assessment	ts, multisource
feedback and other portfolio content.

<sup>&</sup>lt;sup>3</sup> Structured Assessment of Psychotherapy Expertise. Further information on SAPE is available in core curriculum 2010, available from - <a href="http://www.rcpsych.ac.uk/traininpsychiatry/corespecialtytraining/curriculum.aspx">http://www.rcpsych.ac.uk/traininpsychiatry/corespecialtytraining/curriculum.aspx</a>

3.	3. Demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio- cultural domains.				
By the end of CT3, the trainee should demonstrate the ability to negotiate treatment options in more challenging situations.					
Circ		Mark as appropriate			
A.	Negotiate treatment	☐ yes ☐ no			
В.	Further investigations	☐ yes ☐ no			
C.	Treatment planning	☐ yes ☐ no			
Det	tail the evidence presented by the doctor				
4. Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies. By the end of CT3, the trainee should demonstrate the ability to perform a competent risk assessment and construct a defensible risk management plan in subspecialty services and be able to perform a competent					
ass	essment of a patient who may require intervention using mental health or capacity legis	<b>SIATION.</b> Mark as appropriate			
Α.	Assessing risk	☐ yes ☐ no

C.	Assessment & management of violence, emergency situation or other serious untoward event	☐ yes ☐ no			
D.	Assessment for mental health/capacity legislation	☐ yes ☐ no			
Det	tail the evidence presented by the doctor				
5. Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions.  During CT2 and CT3 the trainee should keep their trainer updated on their progress in undertaking a brief and long term psychological therapy assessed by a supervisor using the SAPE. Trainees must otherwise demonstrate ability to apply specific psychological models in their formulations.
