

Clinical Audit & Managing the Change

M023w

6 external CPD points

Introduction

This workshop will examine Clinical audit and how it is a way to find out if healthcare is being provided in line with standards and allows care providers and patients to know where their service is doing well. Clinical audit is a quality improvement process that seeks to improve patient care and outcomes through systematic review of care against explicit criteria and the review of change. During the session you will also consider the barriers to managing a change project and examine methods of managing change including clear measurable outcomes. Additionally, the course is recommended to provide the knowledge and skills required to meet Good Medical Practice for Revalidation

Course structure

- 1 day workshop - 9:30 – 16:00pm
- Date: Friday 24 November
- Venue: Education Centre at Southport DGH.

What do I gain?

- The time and space in which to work with other colleagues in understanding and exploring many of the issues around this complex subject.
- The opportunity to develop and practise key skills with the support of colleagues and valuable input from an experienced facilitator.
- Allows access to an experienced facilitator who can guide and explain in clear detail how you deal with unexpected situations.
- A valuable contribution towards your ongoing learning as the course delivers six external CPD points.

Workshop objectives

- Revisited clinical audit and understand how it supports clinical governance and continuous improvement in healthcare delivery
- Discussed the link to revalidation and quality improvement
- Identified the criteria for choosing audit topics
- Worked through the stages of the audit cycle
- Understand what makes an effective audit, including closing the loop and re-auditing
- Applied various theories and concepts of change management
- Analyse the group's various motivational and change management issues
- Reached a plan of action to tackle the motivational and change management issues
- Planned the change project
