

Khalid Master BDS

I qualified from Liverpool University in 2000. I work in General Practice with a specialist interest in implants, orthodontics, periodontics, cosmetic treatments and full mouth rehabilitations. Since 2010, I have been a full time partner and clinical director of a multi award winning 4-surgery practice in Blackburn, which has won the Best UK practice title twice, Best Dental Team UK, Investors in People Gold Standard, as well as more 20 other awards. The family practice was established over 100 years ago and has been providing high quality dentistry since 1906. Hence, it benefits from many 3rd or 4th generation patients. In less than 8 years, I have hosted over 100 work experience and work shadowing opportunities for high school, college, university, junior and foreign-trained dentists. I have also done some regional lecturing on a number of clinical, and practice management topics. I consider myself an eternal student and have always been committed to lifelong learning, completing over 250 hours of verifiable CPD in a single year in the recent past. I love learning new things to be better able to improve the lives of my patients and have always been keen on sharing knowledge and good practice with colleagues, which is why I have been involved with peer review and appraisal for more than 10 years.

I have 2 young boys aged 9 and 12 at present. My wife shares my passion for health care, has been a local GP since 2004, and has been working in Preston since 2014. In the little spare time we have, my wife have been involved with a local, not for profit educational charity called AHF, since its inception 2011 as Chief Welfare Officer and Chairman respectively. Through the numerous services in its portfolio, the charity offers positive life experiences for more than 1000 local children and residents every single week.

If you would like to set up an Individual Peer Review contact the [appraisal team](#) and inform us of your ambassador choice
