--

Vulval disease yes can do it perhaps in conjunction with colposcopy

ASM in safe Practice in Abortion Care Yes

We are currently **unable** to provide the following training opportunities (please list)

Free text comments

RLI is Highly Commended for "Overall performance, Obstetric training and Gynaecological training" (2022).

This unit provides excellent training opportunities as being a smaller unit we can be more flexible on your rota to achieve your learning objectives.

You can expect to get into gynae theatre regularly during your placement at MBHT.

Good rota for trainees as weekday nights are covered by a resident consultant therefore maximising your daytime training activities and this will make attending courses easier.

This is considered a good place to complete MRCOG exams and several of our consultants are involved in RCOG exams and keen to help you succeed.
