LETB/Deanery: Scotland Deanery – South East of Scotland	
Programme Information	<p>South East of Scotland provides high quality training in all higher specialties and consistently scores well on the annual GMC survey. The highly acclaimed PSYSTAR programme is supported by the Academic Department and research and audit are strongly supported for all trainees in higher programmes.</p> <p>Postgraduate education in Scotland is very well organised and is very trainee centred. There is excellent communication between consultants and departments and South East Scotland is a friendly place to work. There is the opportunity for city or country living, the vibrancy of Edinburgh contrasting with the countryside of Borders or Fife. There is a good work life balance and the opportunity for a first class training experience.</p>

LETB/Deanery: Scotland Deanery – West of Scotland	
Programme Information	<p>The West of Scotland Deanery ST4 Programmes in Psychiatry are well-established, and cover all specialties and sub-specialties and sub-specialties.</p> <p>Medical Psychotherapy and Forensic Psychiatry programmes can both be completed in the West, as part of National Programmes.</p> <p>Locations cover city centre (Glasgow) to the Ayrshire coast, Solway Firth and Loch Lomond.</p> <p>Excellent academic links exist with Glasgow University. There are good academic training programmes and Audit and Research opportunities. West Deanery offers training programmes in ST4 in all Psychiatric specialties. Additionally, we can offer some less common placements e.g. Perinatal Psychiatry; attachments at the Mental Welfare Commission; and placements with the Scottish Malawi Mental Health Education Project. Programmes rate highly in the GMC Trainee Survey.</p>
