'Run-through' posts are those posts where upon completion of the core surgical curriculum, anyone appointed will move up to the ST3 higher surgical programme for that specialty, without the need to go through national selection.

'Uncoupled' posts are those posts for completion of the core surgical curriculum only. Upon completion, doctors appointed to these will need to apply through national selection for an ST3 higher surgical training post in their chosen specialty.

[Region map](#)

[Page 11](#)

For further information about core surgical training in the north west of England, please visit the [North West School of Surgery website](#)

Each track has two "Track codes" – a sector code (starting "MER" for the Cheshire and Merseyside sector or "NWD" for the Greater Manchester, Lancashire and South Cumbria sector) and a "specialty" code indicating the theme of the track.

PLEASE NOTE

There is significant reorganisation of services ongoing in some north west trusts (due to mergers of trusts etc.) which means that placement sites are subject to change (specified specialties should remain the same).

Version 1.2 – 24 January 2024

update since V1.0 – track NWD25 GS15 removed as we are unable to recruit to this track, change of CT1 posts for track MER30 UroI03

North West of England Core Surgical Training, August 2024 Recruitment – Run-through Tracks

Cheshire and Merseyside Sector

Indicative placements (correct as of 18 January 2024)

Cardio-thoracic surgery		Run-through track	Cheshire and Merseyside sector	
Grade:	ST1		ST2	
Placement Length:	6 months	6 months	6 months	6 months
MER33	CST01	General surgery (colorectal) Southport and Formby DGH	Cardio-thoracic surgery Liverpool Heart and Chest Hospital	Cardio-thoracic surgery Liverpool Heart and Chest Hospital
!	The doctor appointed to the above Cardio-thoracic Surgery run-through post would be expected to progress to ST3 in August 2026. From ST3 onwards they would rotate around the whole of the NHS England – North West Region (Cheshire, Merseyside, Greater Manchester and Lancashire).			

Oral and maxillo-facial surgery		Run-through track	Cheshire and Merseyside sector	
Grade:	ST1		ST2	
Placement Length:	6 months	6 months	6 months	6 months
MER14	OMFS01	General surgery (colorectal) Leighton Hospital	Otolaryngology Royal Liverpool University Hospital	TBC if required
!	The doctor appointed to the above OMFS run-through post is usually expected to progress to ST3 after ST1 (August 2025) and will rotate around the Cheshire and Merseyside sector of NHS England – North West (Cheshire, Merseyside and North Wales).
