StanageDental .

My name is Richard Stanage and qualified in 1987 and I have been a practice owner and clinician here in Thornton since 1991. Yeh wow! Doesn't feel as long to me as it will sound to you but during this time we have become a 7 dentist NHS and private practice doing all aspects of care.

The practice is modern, well equipped at Best Practice for cross infection control and has digital radiography in all surgeries. We use Protaper and Ni/Ti routinely with Endodontics and good quality UK labs for all our Crown and Bridge work. We offer implants and cosmetic orthodontics but like all my colleagues rely on the basics most of the time to keep the dental health of Thornton Cleverley's high.

I have a been a training practice since 1993 and over that time I have 'mentored' 14 graduates into practice and as far as I know all are still practicing. WE have astrong culture in the practice of learning and career development both for us GDP's but also our DCP's.

" of the associates are working for their MJDF and a third already has part one MFDS. We have in surgery internet and wireless everywhere else and much of our work is research based using contemporary papers to back it up.

I am currently studying for both an MSc in Restorative and Cosmetic Dentistry but also a PGcert to enable me to be better equipped to help you adapt and learn for ypour futire careers.

We take Dental Foundation Training seriously and its hard work, with quite a bit to do during your year but there us a lot to know and we want to help take on board as much as possible of the curriculum during the 12 months in as pleasant a working environment as possible.

If you want to know more check oiut the web site www.stanagedental.com and by all means get in touch with any questions you have after the choice you make with either the practice email address info @stanagedental.co.uk or call my practice manager on 07890266972 where Audrey will help you.

Thanks and best of luck.

Richard Stanage BDS MFGDP DPDS.
